NID STUDIO TEST QUESTIONS

Design Brief 1

Project Title: Balance and Form. – Newspaper Structure Challenge

Objective:

The objective of this project is to challenge design students to create a structure using only newspaper and transparent duct tape. The structure should demonstrate the concept of balance by being heavy at the tip and light at the bottom. Students will explore the properties of newspaper as a material and apply creative problem-solving skills to achieve structural integrity while maintaining the desired balance.

Deliverables:

1. A well-balanced structure made solely from newspaper and transparent duct tape.
2. Documentation of the design process, including sketches, prototypes, and notes on material experimentation.
3. A brief written explanation of the design concept, addressing how the structure achieves balance and visual appeal.
4. Presentation of the final structure, showcasing its stability and aesthetic qualities.

Duration: 90 minutes
